COCKPIT FLOOR STORAGE

## 4000 SERIES ACCESS HATCHES

180° Opening

The hinges on our 4000 Series Hatches open 180°, the lid completely covers the mounting flange, concealing the fastenings and deflecting water away from the hatch seal. The seal ensures weatherproofing when the hatch is mounted on horizontal and vertical surfaces. Contoured handles provide a positive twist lock action and easy lift grip (even with gloves). Low profile (13mm above deck), injection moulded UV stable plastic hatches designed for installation on any internal or external flat surface. Reinforced lid with non skid surface. Intrusion below deck 18mm. Screw holes are 5mm countersunk. Available in a choice of white or grey, with or without key security lock. CE Approved.
